Engineering a Safer World

Business Solutions

Mikha Engineering & Consultancy (MEC) is a privately owned Dutch company, with a long term experience in the oil and gas industry.

MEC delivers turnkey projects for our customers combining our own expertise with external parties where they are needed.

Our main focus is supporting our customers with multi-disciplinary engineering and consultancy in a wide range of services:

- Offshore/ onshore engineering projects
- Oil & gas, Energy industry and Petrochemical technical advisory
- Technical inspection
- Procurement
- Expediting
- Specialist resources

Functional Safety Services

Relying on our highly competent TÜV certified engineers we can provide our clients with safety assessment, safety review, safety life cycle documentation and consulting.

MEC can assist a company to establish its safety management plan by providing advice for implementing functional safety into its organization and/or by creating or increasing the awareness under the company's employees, by providing basic functional safety courses.

Engineering

MEC offers a complete range of value-added engineering services. We provide engineering services from concept design to commissioning. Our services are built on our deep understanding of the needs and risks of our customer's projects to determine the required level of support, including analysis, planning and performance evaluation.

MEC undertakes engineering services in Oil & Gas, Energy and Petrochemical projects across all sectors of:

- Process engineering
- Instrumentation and Control engineering
- Electrical engineering
- Civil and structural engineering
- Hydrodynamic engineering
- Mechanical engineering (fixed/rotary equipment)
- Pipeline engineering
- Piping and material engineering
- Safety engineering
- Subsea engineering
